PLUGIN ALLIANCE

Mäag EQ2 Plugin

Flawless Emulation of the Patented Two-Band Equalizer
Musical. Transparent. Air Band®.

Thank you for using the Mäag EQ2 plugin. The Maag Audio EQ2™ is a no compromise one-channel 2-band equalizer with AIR BAND®, Low Mid Frequency (LMF) bell boost from SUB to 1.4 kHz, and an INPUT ATTN to control down to -12.5 dB of attenuation. Following in the fashion of Mäag's EQ4™, the EQ2's AIR BAND is equipped with an additional sassy frequency selection @ 15 kHz, making it hard to resist in any situation.

The LMF provides both tight or wide bell curve options to dial in the perfect amount of warmth on the 2-bus. When it comes to tracking, the EQ2 will quickly become your favorite preamps' "better half" by controlling the input (INPUT ATTN) (great for correcting over driven mic preamp transformers) before eq'ing with the versatile AIR BAND and LMF.

Following its EQ4® predecessor, the EQ2 provides unparalleled transparency and top end presence with the same high quality components found in the powerhouse 6-band EQ4. EQ adjustments are obtained with minimal phase shift and a choice between wide and narrow frequency bands.

The EQ2 serves as a perfect compliment to its six-band counterpart by adding a level of control over your Low Mid frequencies not previously available with the EQ4. Use the EQ2 in serial with your EQ4 (available from [Plugin Alliance](#)) to dial the bass with the narrow Q setting of the LMF band, and boost your Air in the 15 kHz range.

You can also use it simply to add air to vocals or reverberant recordings, or add bottom end to your mix with the SUB setting on the LMF band's wide-Q setting. The INPUT ATTN works particularly well for taming the audio coming into the EQ2, preventing distortion and treating just the peaks of your signal.

Developed under license by Brainworx GmbH Germany for Plugin Alliance LLC USA.

Mäag EQ2 Plugin

Flawless Emulation of the Patented Two-Band Equalizer

Musical. Transparent. Air Band®.

(1) INPUT ATTN
Input attenuator (0-12.5 dB)

(2) LMF SWITCH
Low Mid Frequency selector. Switch in the 'up' position selects a tight bell curve (red band), switch in the 'down' position selects a wide bell curve (white band).

(3) LMF SELECTOR
Bell curve boost at Sub, 40 Hz, 57 Hz, 65 Hz, 88 Hz, 150 Hz, 220 Hz, 250 Hz, 400 Hz, 1 kHz, or 1.4 kHz.

(4) LMF GAIN
Gain control for the LMF: +12 dB (tight bell) to +15 dB (wide bell)

(5) AIR BAND®
Boost only shelf at 2.5 kHz, 5 kHz, 10 kHz, 15 kHz, 20 kHz, or 40 kHz. Frequencies below the shelf peaks are also affected due to the transitional slope.

(6) AIR BAND GAIN
Gain control for the AIR BAND +12 dB (40 kHz) to +17 dB (2.5 kHz)

(7) BAND IN/OUT
Selects whether or not the corresponding band is in-circuit or out of circuit.

(8) Plugin Alliance TOOLBAR

"KEY" ICON
Opens the plugin Activation Dialog

"WRENCH" ICON
Shows information regarding the plugin version, software specifications, and user account.

"?" ICON
Opens a dialog through which one can access the plugin's help documentation, online product page, or any available updates.

"\$" ICON
If you've purchased your Maag EQ2 using the Plugin Alliance Installment Payments option, the "\$" icon, links to your account so you can make a payment on your Lease-License
